

March 2009

Fruit Cove Baptist Church is a growing congregation in northwest St. Johns County, Florida. We currently have a full-time staff of 23 and a part-time staff of 40 for our Weekday Preschool. With the blessing of growth comes issues of database reliability of our membership, financial record keeping and file recovery. Prior to using Yotta280, we depended on a Sony tape backup system. On the several occasions we would try to retrieve a file from the backup, we were only successful part of the time. Either we would discover that the backup did not execute correctly or that the file was not recoverable from the tape. And more often than not, the tape had not been changed properly. With Yotta280 we no longer have to put our faith in a system that was only reliable part of the time. The file recovery system is easy to use and has always worked. We no longer stress during hurricane season, trying to complete manual backups and making trips to the safety deposit box for storage. We have been very pleased with the responsive and helpful nature of the Yotta280 staff. They never seemed bothered or frustrated walking us through the file recovery process or in answering our questions. Contracting with Yotta280 was an easy decision because the ease with which we can retrieve the necessary files and the security of knowing that our information is well secured.

We would strongly recommend Yotta280.
